## Q. 6 - Q. 10 Carry TWO marks each.

| Q.6 | Mosquitoes pose a threat to human health. Controlling mosquitoes using <br> chemicals may have undesired consequences. In Florida, authorities have used <br> genetically modified mosquitoes to control the overall mosquito population. It <br> remains to be seen if this novel approach has unforeseen consequences. <br> Which one of the following is the correct logical inference based on the <br> information in the above passage? |
| ---: | :--- |
| (A) | Using chemicals to kill mosquitoes is better than using genetically modified <br> mosquitoes because genetic engineering is dangerous |
| (B) | Using genetically modified mosquitoes is better than using chemicals to kill <br> mosquitoes because they do not have any side effects |
| (C) | Both using genetically modified mosquitoes and chemicals have undesired <br> consequences and can be dangerous |
