## General Aptitude (GA)

## Q. 1 - Q. 5 Carry ONE mark Each

| Q.1 | "You are delaying the completion of the task. Send ____ contributions at the <br> earliest." |
| :--- | :--- |
| (A) | you are |
| (B) | your |
| (C) | you're |
| (D) | yore |
|  |  |

| Q.2 | References :___ : : Guidelines : Implement <br> (By word meaning) |
| :--- | :--- |
|  |  |
| (A) | Sight |
| (B) | Site |
| (C) | Cite |
| (D) | Plagiarise |
|  |  |

| Q.3 | In the given figure, PQRS is a parallelogram with $\mathrm{PS}=7 \mathrm{~cm}, \mathrm{PT}=4 \mathrm{~cm}$ and <br> $\mathrm{PV}=5 \mathrm{~cm}$. What is the length of RS in cm ? (The diagram is representative.) |
| :--- | :--- |
| (A) | $\frac{20}{7}$ |
| (B) | $\frac{28}{5}$ |
| (C) | $\frac{9}{2}$ |
| (D) | $\frac{35}{4}$ |

| Q.4 | In 2022, June Huh was awarded the Fields medal, which is the highest prize in <br> Mathematics. <br> When he was younger, he was also a poet. He did not win any medals in the <br> International Mathematics Olympiads. He dropped out of college. <br> Based only on the above information, which one of the following statements can <br> be logically inferred with certainty? |
| :--- | :--- |
| (A) | Every Fields medalist has won a medal in an International Mathematics <br> Olympiad. |
| (B) | Everyone who has dropped out of college has won the Fields medal. |
| (C) | All Fields medalists are part-time poets. |
| (D) | Some Fields medalists have dropped out of college. |
|  |  |

| Q. 5 | A line of symmetry is defined as a line that divides a figure into two parts in a way <br> such that each part is a mirror image of the other part about that line. <br> The given figure consists of 16 unit squares arranged as shown. In addition to the <br> three black squares, what is the minimum number of squares that must be <br> coloured black, such that both PQ and MN form lines of symmetry? (The figure is <br> representative) |
| :--- | :--- | :--- |
|  |  |
| (A) | 3 |
| (B) | 4 |
| (C) | 5 |

## Q. 6 - Q. 10 Carry TWO marks Each

| Q.6 | Human beings are one among many creatures that inhabit an imagined world. In <br> this imagined world, some creatures are cruel. If in this imagined world, it is given <br> that the statement "Some human beings are not cruel creatures" is FALSE, then <br> which of the following set of statement(s) can be logically inferred with certainty? <br> (i) |
| :--- | :--- |
| (ii) All human beings are cruel creatures. <br> (iii) <br> (iv) | Some human beings are cruel creatures. <br> No human beings are cruel creatures. |
| (A) | only (i) |
| (B) | only (iii) and (iv) |
| (C) | only (i) and (ii) |
| (D) | (i), (ii) and (iii) |
|  |  |

| Q.7 | To construct a wall, sand and cement are mixed in the ratio of 3:1. The cost of <br> sand and that of cement are in the ratio of 1:2. <br> If the total cost of sand and cement to construct the wall is 1000 rupees, then what <br> is the cost (in rupees) of cement used? |
| :--- | :--- |
|  |  |
| (A) | 400 |
| (B) | 600 |
| (C) | 800 |
| (D) | 200 |

| Q. 8 | The World Bank has declared that it does not plan to offer new financing to Sri <br> Lanka, which is battling its worst economic crisis in decades, until the country has <br> an adequate macroeconomic policy framework in place. In a statement, the World <br> Bank said Sri Lanka needed to adopt structural reforms that focus on economic <br> stabilisation and tackle the root causes of its crisis. The latter has starved it of <br> foreign exchange and led to shortages of food, fuel, and medicines. The bank is <br> repurposing resources under existing loans to help alleviate shortages of essential <br> items such as medicine, cooking gas, fertiliser, meals for children, and cash for <br> vulnerable households. <br> Based only on the above passage, which one of the following statements can be <br> inferred with certainty? |
| :--- | :--- |
| (A) | According to the World Bank, the root cause of Sri Lanka's economic crisis is that <br> it does not have enough foreign exchange. |
| (B) | The World Bank has stated that it will advise the Sri Lankan government about <br> how to tackle the root causes of its economic crisis. |
| (C) | According to the World Bank, Sri Lanka does not yet have an adequate <br> macroeconomic policy framework. |
| (D) | The World Bank has stated that it will provide Sri Lanka with additional funds for <br> essentials such as food, fuel, and medicines. |
| ( |  |

| Q.9 | The coefficient of $x^{4}$ in the polynomial $(x-1)^{3}(x-2)^{3}$ is equal to $\quad$. |
| :--- | :--- |
|  |  |
| (A) | 33 |
| (B) | -3 |
| (C) | 30 |
| (D) | 21 |

| Q.10 | Which one of the following shapes can be used to tile (completely cover by <br> repeating) a flat plane, extending to infinity in all directions, without leaving any <br> empty spaces in between them? The copies of the shape used to tile are identical <br> and are not allowed to overlap. |
| :--- | :--- |
|  |  |
| (A) | circle |
| (B) | regular octagon |
| (C) | regular pentagon |
| (D) | rhombus |
|  |  |

## Q. 11 - Q. 35 Carry ONE mark Each

| Q. 11 | The value of $x$ for which the inverse of the following matrix does not exist is |
| :---: | :---: |
|  | $\left[\begin{array}{rrr}1 & 3 & 0 \\ 2 & x & 4 \\ -1 & 0 & 2\end{array}\right]$ |
| (A) | 0 |
| (B) | 1 |
| (C) | 10 |
| (D) | 12 |
| Q. 12 | The value of $y$ for which the following limit exists is |
|  | $\lim _{x \rightarrow 1} \frac{2 x^{2}-y x-x+3}{3 x^{2}-5 x+2}$ |
| (A) | 2 |
| (B) | 3 |
| (C) | 4 |
| (D) | 5 |
|  |  |

| Q.13 | The probability of the standard normal variable taking values between 0 and 1 is <br> 0.3413, between 0 and 2 is 0.4772, and between 0 and 3 is 0.4987. The average of <br> marks in an examination is 68 and the standard deviation is 10 . The percentage of <br> examinees getting less than 48 marks is |
| :--- | :--- |
| (A) | 2.28 |
| (B) | 10.31 |
| (C) | 47.72 |
| (D) | 52.78 |
| Q.14 | The amide linkage is NOT present in |
| (A) | Wool |
| (B) | Aramid |
| (C) | Lyocell |
| (D) | Nylon 66 |
|  |  |

| Q.15 | In the amorphous phase, polymer chains prefer to be in a random coil <br> conformation to |
| :--- | :--- |
| (A) | Maximize entropy |
| (B) | Maximize enthalpy |
| (C) | Minimize entropy |
| (D) | Minimize enthalpy |
| Q.16 | The spinning system that inserts false twist is |
| (A) | Ring spinning |
| (B) | Compact spinning |
| (C) | Air-jet spinning |
| (D) | Air-vortex spinning |
|  |  |

| Q.18 | The bonding process followed for production of highloft nonwoven is |
| :--- | :--- |
| (A) | Needle punching |
| (B) | Hydroentanglement |
| (C) | Calendar bonding |
| (D) | Through-air bonding |
| Q.19 | A drum-driven winder is fitted with a 3-diamond drum. The number of revolutions <br> of the drum for single traverse is |
| (A) | 1.5 |
| (B) | 3 |
| (C) | 6 |
| (D) | 9 |
|  |  |

| Q. 20 | The cut length of a staple polyester fibre is approximately equal to the effective length of a specific variety of long staple cotton fibre. When these two types of fibres are blended in nearly equal proportion, the typical comb sorter diagram of the blended fibre-tuft is |
| :---: | :---: |
| (A) |  |
| (B) |  |
| (C) |  |
| (D) |  |
|  |  |

| Q.21 | During the measurement of cotton fibre fineness (micronaire) by air flow method, <br> a higher quantity of cotton fibre is taken by mistake than specified. The reading of <br> micronaire value from the instrument will be |
| :--- | :--- |
| (A) | Higher for any fibre fineness |
| (B) | Lower for any fibre fineness |
| (C) | Lower for only coarser fibres |
| (D) | Lower for only finer fibres |
| Q.22 | Amongst the following, hydrolytic desizing agents attack starch at |
| (A) | $\alpha-1,4$ glucosidic linkage |
| (B) | Six membered ring |
| (C) | Hydroxyl group |
| (D) | Carboxyl group |
|  |  |

| Q.23 | In resist style of printing, the preferred arrangement for dyeing is |
| :--- | :--- |
| (A) | Kiss roll applicator |
| (B) | Nip padding |
| (C) | Immersion padding with vertical roller arrangement |
| (D) | Immersion padding with horizontal roller arrangement |
| Q.24 | If twist factor is same for a set of cotton yarns, then the yarns have same |
| (A) | Linear density |
| (B) | Turns per metre |
| (C) | Packing density |
| (D) | Angle of twist of surface fibres |
| (A) |  |

| Q.25 | Copolymers are present in |
| :--- | :--- |
| (A) | Nylon 6 fibre |
| (B) | Nylon 66 fibre |
| (C) | Acrylic fibre |
| (D) | PET fibre |
| Q.26 | Amongst the following weft knitted structures, double jersey structure(s) is/are |
| (A) | Rib |
| (B) | Interlock |
| (C) | Single cross tuck |
| (D) | Eight lock |
|  |  |

| Q.27 | For the same turns per unit length, as the yarn becomes coarser |
| :--- | :--- |
| (A) | Twist angle decreases |
| (B) | Twist angle increases |
| (C) | Twist multiplier decreases |
| (D) | Twist multiplier increases |
| Q.28 | In flame retardant finishing of cotton fabric, the correct statement(s) is/are |
| (A) | The finishing material forms an insulating layer around the fibre at a temperature <br> above the fibre pyrolysis temperature |
| Q.30 | The area under the curve $y=x^{2}+2 x$ between $x=0$ and $x=4$, using the <br> trapezoidal rule with a step size of one, (in integer) is <br> (B)The finishing material forms an insulating layer around the fibre at a temperature <br> below the fibre pyrolysis temperature |
| (C) | The finishing material crosslinks cellulose and alters the pyrolysis route |
| The Newton-Raphson method is being used for two iterations to find an |  |
| approximate solution of the equation $e^{x}-1=0$ with an initial guess of 1. The |  |
| difference between the actual and approximate solutions (rounded off to 2 decimal |  |
| places) is |  |
| The finishing material dehydrates the cellulose |  |
|  |  |
|  |  |

## Q. 36 - Q. 65 Carry TWO marks Each

| Q.36 | Two eigenvalues of the following matrix are 3 and 6. The third eigenvalue is |
| :--- | :--- |
|  |  |
| (A) | -5 |
| (B) | -1 |
| $\left.\begin{array}{rrrr\|}-2 & -4 & 2 \\ 4 & 1 & 2 \\ 2\end{array}\right]$ |  |
| (C) | 1 |
| (D) | 4 |
| Q.37 | Two vertical poles of height 6 m and 18 m are 10 m apart on a flat ground. A <br> string needs to be connected from the top of one pole to a peg on the ground and <br> then on to the top of the other pole. The minimum length (m) of the string is |
| (A) | 25 |
| (B) | 26 |
| (C) | 27 |
| (D) | 28 |
|  |  |

| Q. 38 | Consider the following statements regarding Nylon 6 production from caprolactam using water as a catalyst. <br> P. The first reaction involving ring-opening of caprolactam with water is an endothermic reaction <br> Q. Increase in water concentration during the polycondensation results in a higher molecular weight polymer <br> R. The polycondensation is an irreversible reaction <br> S. Increase in temperature during the polycondensation results in a lower molecular weight polymer <br> The correct combination of TRUE statements is |
| :---: | :---: |
| (A) | P and Q |
| (B) | Q and R |
| (C) | R and S |
| (D) | S and P |
| Q. 39 | Determine the correctness or otherwise of the following Assertion [a] and Reason [r]. <br> [a]: In boiling water, polyester POY shows higher shrinkage than polyester FDY <br> [r]: Molecular chain orientation is higher in polyester FDY than in polyester POY |
| (A) | Both [a] and [r] are true and [r] is the correct reason for [a] |
| (B) | Both [a] and [r] are true but [r] is not the correct reason for [a] |
| (C) | Both [a] and [r] are false |
| (D) | [a] is true but [r] is false |

| Q.40 | Consider the following activities on a carding machine <br> P. $\quad$ Lowering surface speed of feed roller <br> Q. $\quad$ Increasing rotational speed of taker-in <br> R. $\quad$ Increasing linear density of feed material <br> S. $\quad$ Use of shorter and finer fibres <br> The correct combination of the above activities to obtain more number of taker-in <br> teeth acting per fibre is |
| :--- | :--- |
| (A) | P and Q |
| (B) | Q and R |
| (C) | R and S |
| (D) | S and P |
|  |  |

| Q.41 | Consider the following statements with regard to the timing diagram of a cotton <br> combing machine. <br> P. $\quad$In forward feed system, feeding mostly takes place when nippers are <br> closing <br> R. $\quad$Cylinder comb starts combing after feeding ends <br> Detaching rollers move backward during forward movement of nipper <br> assembly <br> S. $\quad$Top comb is not combing when detaching rollers move forward <br> The correct combination of TRUE statements is <br> (A)Pand Q <br> (B) <br> Q and R <br> (C) <br> R and S <br> S and P |
| :--- | :--- |

| Q.42 | Consider the following reasons of shuttle loom stoppage. <br> P. $\quad$ Breakage of warp yarns <br> Q. $\quad$ Entrapment of shuttle inside the shed <br> R. Flying of shuttle out of the shed <br> S. $\quad$ Slackening of a warp yarn <br> The correct combination that triggers the warp protector motion is |
| :--- | :--- |
| (A) | P and Q |
| (B) | Q and R |
| (C) | R and S |
| (D) | S and P |
| Q.43 | In warp knitting, the lapping movement having only under-lap is |
| (A) | Closed lap |
| (B) | Open lap |
| (C) | Laying-in |
| Miss-lapping |  |

| Q. 44 | Determine the correctness or otherwise of the following Assertion [a] and Reason [r] <br> [a]: $\mathrm{MgCl}_{2}$ is used in the formulation of anti-crease finishing of cotton fabric with DMDHEU <br> [ r$]: \mathrm{MgCl}_{2}$ is an acidic salt and acts as a catalyst |
| :---: | :---: |
| (A) | Both [a] and [r] are true and [r] is the correct reason for [a] |
| (B) | Both [a] and [r] are true but [r] is not correct reason for [a] |
| (C) | Both [a] and [r] false |
| (D) | [a] is true but [r] is false |
| Q. 45 | Determine the correctness or otherwise of the following Assertion [a] and Reason [r] <br> [a]: A partially scoured cotton fabric bleached with $\mathrm{H}_{2} \mathrm{O}_{2}$ exhibits higher water absorbancy than that bleached with $\mathrm{NaClO}_{2}$ <br> [r]: Bleaching with $\mathrm{H}_{2} \mathrm{O}_{2}$ also facilitates scouring |
| (A) | Both [a] and [r] are true and [r] is the correct reason for [a] |
| (B) | Both [a] and [r] are true but [r] is not correct reason for [a] |
| (C) | Both [a] and [r] false |
| (D) | [a] is true but [r] is false |
|  |  |

| Q.46 | In wet spinning of acrylic fibres |
| :--- | :--- |
| (A) | Two-way mass transfer is involved |
| (B) | One-way mass transfer is involved |
| (C) | Coagulation bath having spinneret contains only solvent |
| (D) | Coagulation bath having spinneret contains both solvent and non-solvent |
| Q.47 | Drafting force in drawframe, when fibres are sliding, reduces with higher |
| (A) | Draft |
| (B) | Roller setting |
| (C) | Fibre length |
| (D) | Number of fibres in feed sliver |
|  |  |

| Q.48 | The force exerted by the reed on the cloth-fell at the instant of beat-up (weaving <br> resistance) depends on |
| :--- | :--- |
| (A) | Free length of warp yarn |
| (B) | Elastic modulus of loom-state fabric |
| (C) | Elastic modulus of warp yarn |
| (D) | Elastic modulus of weft yarn |
| Q.49 | With reference to KES-FB and FAST systems, the same low stress mechanical <br> property is measured by |
| (A) | KES-FB1 and FAST 1 |
| (B) | KES-FB2 and FAST 2 |
| (C) | KES-FB3 and FAST 1 |
| (D) | KES-FB2 and FAST 3 |
|  |  |

| Q.50 | With reference to the work factor (WF) and work of rupture (WR) of two yarns <br> with same breaking load and same breaking elongation, the correct statement(s) <br> is/are |
| :--- | :--- |
| (A) | The WR of yarn with WF $=0.3$ is more than that with WF $=0.5$ |
| (B) | The WR of yarn with WF $=0.3$ is less than that with WF $=0.5$ |
| (C) | If breakage takes place within the Hooke's region, then the WF is more than 0.5 |
| (D) | If breakage takes place within the Hooke's region, then the WF is equal to 0.5 |
| Q.51 | Amongst the Classimat faults A2, B1, D4, H2 and I1, the correct statement(s) <br> is/are |
| (A) | D4 and A2 are the thickest fault and the shortest fault, respectively |
| (B) | I1 and H2 are the longest fault and the thinnest fault, respectively |
| (C) | D4 and I1 are the thickest fault and the thinnest fault, respectively |
| (D) | B1 and H2 are the most objectionable fault and the longest fault, respectively |
|  |  |

| Q.65 | In a continuous scouring operation, a desized fabric (with 40 \% wet expression) is <br> dipped into a saturator (alkali bath) before it enters a J-box for scouring. After <br> saturation in the alkali bath, the wet expression increases to 100 \%. The required <br> alkali concentration (w/v) of the liquor present in the fabric exiting the saturator is <br> $6 \%$. Considering no liquor interchange in the saturator, the alkali concentration <br> (w/v) in percentage in the saturator (in integer) is |
| :--- | :--- |

## END OF QUESTION PAPER
