Once there was a caterpillar. He was very sad. He hid under the green leaf and looked at an insect. It was so beautiful. Then he looked at his own body. He was long and green. He had pointed thorns all over his body. He thought he was really ugly. “Excuse me, who are you?” the caterpillar asked the beautiful insect. “I am a butterfly,” said the creature sitting on a yellow rose.

We get water from rain. It is the main source of water. Rain water fills wells, tanks, rivers and ponds. All of these are called sources of water. Most people in the cities get water from the taps. Water from rivers and lakes is first cleaned and then pumped to the overhead tanks. The water stored in the overhead tanks is supplied to our houses through a pipeline. We get this water from taps.
