**Passage-1**

The major socio-economic problem being faced by India is 'Poverty'. Even after seven decades of independence, the country is still fighting against this social evil of poverty. It is estimated that nearly one-third of Indian population of 1.21 billion, i.e., nearly 426 millions of people are living below poverty line. Many go without a meal a day. Though governments are struggling hard to eradicate poverty, the increasing population and mismanagement of government schemes, have fuelled the growth of poverty. The population is growing at an alarming rate. In last ten years the population has grown by 0.20 billion. The positive effects of development are nullified by increase in population. Hence there is an urgent need to curtail population growth, by adopting strict family planning programmes by government.

41. According to the passage, what is the biggest obstacle in the path of development?
- a. Strict family planning programmes
  - b. Seven decades of independence
  - c. The alarming growth of population
  - d. Doling out of mid-day meals
42. According to this passage, the most pressing need is to curtail
- a. family planning programmes
  - b. population growth
  - c. government schemes
  - d. mid-day meals

**Passage-2**

Marie Curie was one of the most accomplished scientists in history. Together with her husband, Pierre, she discovered radium, an element widely used for treating cancer, and studied uranium and other radioactive substances. Pierre and Marie's amicable collaboration later helped to unlock the secrets of the atom.

Marie was born in 1867 in Warsaw, Poland, where her father was a professor of physics. At an early age, she displayed a brilliant mind and a blithe personality. Her great exuberance for learning prompted her to continue with her studies after high school. She became disgruntled, however, when she learned that the university in Warsaw was closed to women. Determined to receive a higher education, she defiantly left Poland and in 1891 entered the Sorbonne, a French university, where she earned her master's degree and doctorate in physics. Marie was fortunate to have studied at the Sorbonne with some of the greatest scientists of her day, one of whom was Pierre Curie. Marie and Pierre were married in 1895 and spent many productive years working together in the physics laboratory. A short time after they discovered radium, Pierre was killed by a horse-drawn wagon in 1906. Marie was stunned by this horrible misfortune and endured heartbreaking anguish. Despondently she recalled their close relationship and the joy that they had shared in scientific research. The fact that she had two young daughters to raise by herself greatly increased her distress. Curie's feeling of desolation finally began to fade when she was asked to succeed her husband as a physics professor at the Sorbonne. She was the first woman to be given a professorship at the world famous university. In 1911, she received the Nobel Prize in chemistry for isolating radium. Although Marie Curie eventually suffered a fatal illness from her long exposure to radium, she never became disillusioned about her work. Regardless of the consequences, she had dedicated herself to science and to revealing the mysteries of the physical world.

43. According to the passage, what did Marie Curie discover?

- a. Polonium
- b. Neptunium
- c. Helium
- d. Radium

- 44.** What was Marie Curie by birth?
- a. French
  - b. Swiss

  - b. 30
  - c. 27
  - d. 28
- 46.** How old was Marie Curie when she won the Nobel Prize?
- a. 40
  - b. 44
  - c. 34
  - d. 47
- 47.** After serving as a Professor at Sorbonne, in which category did Marie Curie win the Nobel Prize?
- a. Mathematics
  - b. Chemistry
  - c. Physics
  - d. Physiotherapy

**Passage-3**

One of the most intriguing stories of the Russian Revolution concerns the identity of Anastasia, the youngest daughter of Czar Nicholas II. During his reign over Russia, the Czar had planned to revoke many of the harsh laws established by previous Czars. Some workers and peasants, however, clamored for more rapid social reform. In 1918, a group of these people known as Bolsheviks overthrew the government. On July 17 or 18, they murdered the Czar and what was thought to be his entire family. Although witnesses vouched that all the members of the Czar's family had been executed, there were rumors suggesting that Anastasia had survived. Over the years, a number of women claimed to be Grand Duchess Anastasia. Perhaps the most famous claimant was Anastasia Tschaikovsky, who was also known as Anna Anderson. In 1920, 18 months after the Czar's execution, this terrified young woman was rescued from drowning in a Berlin river. She spent two years in a hospital, where she attempted to reclaim her health and shattered mind. The doctors and nurses thought that she resembled Anastasia and questioned her about her background. She disclaimed any connection with the Czar's family. Eight years later, however, she claimed that she was Anastasia. She said that she had been rescued by two Russian soldiers after the Czar and the rest of her family had been killed. Two brothers named Tschaikovsky had carried her into Romania. She had married one of the brothers, who had taken her to Berlin and left her there, penniless and without a vocation. Unable to invoke the aid of her mother's family in Germany, she had tried to drown herself. During the next few years, scores of the Czar's relatives, ex-servants, and acquaintances interviewed her. Many of these people said that her looks and mannerisms were evocative of the Anastasia that they had known. Her grandmother and other relatives denied that she was the real Anastasia, however. Tired of being accused of fraud, Anastasia immigrated to the United States in 1928 and took the name Anna Anderson. She still wished to prove that she was Anastasia, though, and returned to Germany in 1933 to bring suit against her mother's family. There she declaimed to the court, asserting that she was indeed Anastasia and deserved her inheritance. In 1957, the court decided that it could neither confirm nor deny Anastasia's identity. Although it will probably never be known whether this woman was the grand Duchess Anastasia, her search to establish her identity has been the subject of numerous books, plays, and movies.

48. Where was Anastasia abandoned penniless?

- a. United States
- b. Russia
- c. Romania
- d. Germany

49. Who killed the Czar Nicholas II?

- a. Bolsheviks
- b. Mensheviks
