SECTION A

(Reading Skills)

1. Read the following passage carefully :

Kindness is defined as the quality of being friendly, generous, and considerate. Affection, gentleness, warmth, concern, and care are words that are associated with kindness. While kindness has a connotation of meaning someone is naive or weak, that is not the case. Being kind often requires courage and strength. Kindness is an interpersonal skill.

You've heard about survival of the fittest and Darwin. Survival of the fittest is usually associated with selfishness, meaning that to survive (a basic instinct) means to look out for yourself. But Darwin, who studied human evolution, actually

didn't see mankind as being biologically competitive and self-interested. Darwin believed that we are a profoundly social and caring species. He argued that sympathy and caring for others is instinctual.

Current research supports this idea. Science has now shown that devoting resources to others, rather than having more and more for yourself, brings about lasting well-being. Kindness has been found by researchers to be the most important predictor of satisfaction and stability in a marriage. Many colleges, including Harvard, are now emphasizing kindness on applications for admission. There are different ways to practice kindness. One way to be kind is to open your eyes and be active when you see people in need. Do you notice when people could use a helping hand? A sense of community is created when people are kind to those who need help.

Kindness is also about telling the truth in a gentle way when doing so is helpful to the other person. Receiving accurate feedback in a loving and caring way is an important part of a trusted relationship. The courage to give and receive truthful feedback is a key component of growth and flexible thinking. Kindness could add more satisfaction to and strengthen your relationships. (295 words)

2. Read the following passage carefully :

Swimming is the best sport. It is a good all round activity and the only sport that is good for everybody irrespective of the age of the person. It is an individual or team sport that requires the use of one's arms and legs to move the body through water. The sport takes place in pools or open water (e.g., in a sea or lake). Competitive swimming is one of the most popular Olympic sports, with varied distance events in butterfly, backstroke, breaststroke, freestyle, and individual medley. Swimming each stroke requires a set of specific techniques, and in the competition, there are distinct regulations concerning the acceptable form for each individual stroke.

There are multiple health benefits associated with the sport. Swimming is an activity that burns lots of calories. It helps maintain healthy weight as it tones all the muscles in the body. So, whether you swim a gentle breaststroke or a hammer butterfly, you will get a full body workout. Swimming also helps to de-stress and relax. Swimming, regularly, can lower stress levels, reduce anxiety and depression. It takes just a light swim to feel the mental benefits of swimming. So, swim away to good health. (198 words)
