SECTION A
(Reading Skills)

1. Read the following passage and answer the questions set below it: 5

Education is not an end, but a means to an end. In other words, we do not educate children only for the purpose of educating them. The purpose of education is to make them fit for life. As soon as we realize this fact, we will understand that it is very important to choose a system of education which will really prepare children for life.

In many modern countries, it has for sometime been fashionable to think that, by free education for all, whether rich or poor, clever or stupid – one can solve all the problems of society and build a perfect nation. But we can already see that free education for all is not enough, we find in such countries a far larger number of people with university degrees than there are jobs for them to fill. Because of their degrees, they refuse to do manual labour.

But we have only to think a moment to understand that the work of a completely uneducated farmer is far more important than that of a professor; we can live without education, but we die if we have no food. If no one cleaned our street and took the rubbish away from our houses, we should get terrible disease in our towns.

In fact, when we say that all of us must be fit for life, it means that we must be educated in such a way that, firstly, each of us should do whatever job is suitable for our brain, aptitude and ability and secondly, that we can realize that all jobs are necessary to the society. It is very bad to be ashamed of work, or to scorn someone else's work. Only such type of education can be called valuable to society. (298 words) (Source: I.E.L.T.S.)
