OR

"Nature acts as a foster mother for the needs of poor and helpless children."
Support your idea in the poem 'Life's Beginning'.

OR

"In the name of modernity and westernisation, we are causing danger to our own nature and culture." Comment on the statement with reference to 'Unni Katha'.

- IV. Read the following passage and answer the questions set on it : 10 × 1 = 10

One of the turning points in the history of modern scientific developments has been the invention and use of computers. The birth of the computer can be traced to the work of a Scottish mathematician John Napier. In the period between 1800 to 1950 a number of developments took place in this innovative field.

In today's situation computer awareness is a part of basic and fundamental education. Without computer education, it is difficult to think of a successful career now. Computers are used in all fields and all types of industries. They are used in offices, hospitals, industries, merchant centres, research centres, schools and colleges and in the field of mass communication. All this means lakhs of exciting careers.

Computers have given a new work culture to modern man. It has made inroads in almost all the areas of human activity. In business it has taken over most of the clerical work like calculations, preparation of pay bills, account books etc. Similarly, heavy industries are using computers in a big way for operational controls. The medical profession has benefited immensely for on computers heart beat, pulse rate and pathological tests, have reached new standard of accuracy.

Networking is the latest development in the field of computers. A network is a system where computers are electronically linked to one another through a cable or a satellite. At the tap of a keyboard one can get a whole lot of information on retail data outlets. The very important areas of networking are E-mail, E-commerce, Video Text, Tele Conferencing etc.

Television has both audio and video facilities but, there is hardly any element of human activity. But, the special feature of this computer technology is human interaction with the machine. Computers are mixed blessing in the context of Indian conditions. India needs labour intensive technique, whereas computers have compounded our unemployment problems. Much of the existing staff in offices, banks and industries has been declared redundant. However, computers will never replace man in toto. Human brain will ever remain a super computer. Computer is not in a position to create an idea by itself. Computers are nothing but creation of man. They are just a valuable friend of tiring human brain. Unlike other inventions and discoveries, computers do not vitiate human life on this planet.

Computers have offered vast career prospects both in Hardware and Software sectors. Education in computers and their use are creating limitless opportunities in job markets. According to statistics, the computer industry has been growing at the rate of 40% per annum. Indians have already made a mark in international technology. They offer strong challenge to the competitors from other countries.

Questions :
