XI. Read the following passage carefully and answer the questions given below :

1 × 4 = 4 (2 + 2)

45. Tsunami is one of the most powerful and destructive natural forces on the planet earth. A huge amount of energy under the water tries to travel to ocean's surface. As it does, it pushes water up with it and this causes the sea level to rise. However, gravity pulls this water back towards earth. This spreads the energy out to the sides. Water begins to race towards the land at speeds of upto 500 miles per hour, which is faster than an aeroplane can travel. The waves can cross an entire ocean in less than one day without losing energy.

A tsunami is not just one wave, it is a series of waves commonly known as a wave train. It is not always the first wave of a tsunami which is the most destructive. Due to Tsunami boulders are lifted, buildings are destroyed and vehicles are swept away as the water races up to one mile in land before repealing back away from the coast.

Questions :

- a) How does the Tsunami form ?
- b) What destructions can a Tsunami cause ?

[Turn over

XII. Write an essay of about 18-20 sentences on any one of the following topics :

1 × 5 = 5
