INSTRUCTIONS

1. IMMEDIATELY AFTER THE COMMENCEMENT OF THE EXAMINATION, YOU SHOULD CHECK THAT THIS TEST BOOKLET DOES **NOT** HAVE ANY UNPRINTED OR TORN OR MISSING PAGES OR ITEMS, ETC. IF SO, GET IT REPLACED BY A COMPLETE TEST BOOKLET.
2. Please note that it is the candidate's responsibility to encode and fill in the Roll Number and Test Booklet Series A, B, C or D carefully and without any omission or discrepancy at the appropriate places in the OMR Answer Sheet. Any omission/discrepancy will render the Answer Sheet liable for rejection.
3. You have to enter your Roll Number on the Test Booklet in the Box provided alongside.
DO NOT write *anything else* on the Test Booklet.
4. This Test Booklet contains **120** items (questions). Each item comprises four responses (answers). You will select the response which you want to mark on the Answer Sheet. In case you feel that there is more than one correct response, mark the response which you consider the best. In any case, choose **ONLY ONE** response for each item.
5. You have to mark all your responses **ONLY** on the separate Answer Sheet provided. See directions in the Answer Sheet.
6. All items carry equal marks.
7. Before you proceed to mark in the Answer Sheet the response to various items in the Test Booklet, you have to fill in some particulars in the Answer Sheet as per instructions sent to you with your Admission Certificate.
8. After you have completed filling in all your responses on the Answer Sheet and the examination has concluded, you should hand over to the Invigilator **only the Answer Sheet**. You are permitted to take away with you the Test Booklet.
9. Sheets for rough work are appended in the Test Booklet at the end.
10. **Penalty for wrong answers :**
THERE WILL BE PENALTY FOR WRONG ANSWERS MARKED BY A CANDIDATE IN THE OBJECTIVE TYPE QUESTION PAPERS.
 - (i) There are four alternatives for the answer to every question. For each question for which a wrong answer has been given by the candidate, **one-third** of the marks assigned to that question will be deducted as penalty.
 - (ii) If a candidate gives more than one answer, it will be treated as a **wrong answer** even if one of the given answers happens to be correct and there will be same penalty as above to that question.
 - (iii) If a question is left blank, i.e., no answer is given by the candidate, there will be **no penalty** for that question.

The sequence of the four sentences in the middle, labelled as P, Q, R, and S, has been jumbled. You are required to find the proper sequence of the four jumbled sentences and mark your response on the Answer Sheet accordingly.

31. S1: The word science originates from the Latin verb *Scientia* meaning "to know".

S6: By the middle of the twentieth century, science had become a truly international enterprise, with many cultures and countries contributing to its rapid growth.

P: Science, in a broad sense, is as old as the human species.

Q: From the sixteenth century onwards, great strides were also made in science in Europe.

R: The early civilisations of Egypt, India, China, Greece, Mesopotamia and many others made vital contributions to its progress.

S: The Sanskrit word *Vijñāna* and the Arabic word *Ilm* convey a similar meaning, namely knowledge.

- (d) SQPR

32. S1: Britain was the first country to experience modern industrialisation.
- S6: This gave people a wider choice of ways to spend their earnings and expanded the market for the sale of goods.
- P: Stability meant that the Kingdom had common laws, a single currency and a market that was not fragmented by local authorities levying taxes on goods that passed through their area, thus increasing their price.
- Q: It had been politically stable since the seventeenth century, with England, Wales and Scotland unified under a monarchy.
- R: By the end of the seventeenth century, money was widely used as the medium of exchange.
- S: As a consequence, a large section of the people received their income in the form of wages and salaries, rather than in goods.

36. S1 : A seasoned cricketer catches a cricket ball coming in with great speed far more easily than a novice, who can hurt his hands in the act.
- S6 : The conclusion is clear: force not only depends on the change in momentum, but also on how fast the change is brought about.
- P : The novice, on the other hand, keeps his hands fixed and tries to catch the ball almost instantly.
- Q : One reason is that the seasoned cricketer allows a longer time for his hands to stop the ball.
- R : Consequently, he needs to provide a much greater force to stop the ball instantly, and this hurts.
- S : He does this by drawing his hands backward in the act of catching the ball.

37. S1 : People fall down from staircases in different ways in different countries.
- S6 : This is because for the Americans, their home is usually the only place where they regularly use the stairs.
- P : They rely, instead, on the ease and safety of lifts and escalators which are ubiquitous in such places.
- Q : This is not because the Japanese are more reckless staircase users, but simply because Americans don't much use the stairs in public places.
- R : Staircase injuries, therefore, happen mostly in the home.
- S : For instance, someone in Japan is far more likely to be hurt in a staircase fall in an office, department store or railway station than is anyone in the United States.

Directions : Read the following passage carefully and answer the questions that follow the passage. Your answers to the questions should be based on the passage only.

Passage

As the new century begins, it is becoming evident to urban dwellers, whether in industrial or developing countries, that there is an immanent conflict between the automobile and the city. Urban air pollution, often from automobiles, claims millions of lives. Congestion also takes a direct economic toll in rising costs in time and the use of petrol.

Another cost of cities that are devoted to cars is a psychological one, a deprivation of contact with the natural world — an “asphalt complex”. There is a growing body of evidence that there is an innate human need for contact with nature. Both ecologists and psychologists have been aware of this for some time. Ecologists, led by Harvard University biologist E.O. Wilson, have formulated the “biophilia hypothesis”, which argues that those who are deprived of contact with nature suffer psychologically and that this deprivation leads to a measurable decline in well-being.

Meanwhile psychologists have coined their own term — ecopsychology — in which they make the same argument. Theodore Roszak, a leader in this field, cites a study that documents humans’ dependence on nature by looking at the rate of recovery of patients in a hospital in Pennsylvania. Those whose rooms overlooked gardens with grass, trees, flowers, and birds recovered from illnesses more quickly than those who were in rooms overlooking the parking lot.

116. The “asphalt complex” refers to :
- (a) The inability of city dwellers to connect with nature
 - (b) The complexity of urban life and air pollution
 - (c) The causality between urban pollution and automobiles
 - (d) The air pollution that results from the construction of asphalt roads

117. The passage draws attention to which one among the following ?
- (a) The need to build more and better roads
 - (b) The need for ecologists to learn from psychologists
 - (c) The need to ban cars in cities
 - (d) The need to remain close to nature even within our cities
118. The “biophilia hypothesis” :
- (a) Argues that psychological disorders are caused by biological organisms
 - (b) Is the design of a biological experiment which studies families that live in cities
 - (c) Formulates that separation from nature leads to infelicitous mental states
 - (d) Describes a philosophy that studies humans in relation to natural phenomena
119. Which one of the following includes the most appropriate and relevant set of keywords that match the concept of ‘ecopsychology’, as given in the passage ?
- (a) Wilson, automobile and city, deprivation of nature
 - (b) Urban dwellers, ecologists, trees and flowers
 - (c) Roszak, Pennsylvania, nature-induced recovery of patients
 - (d) Well-being denial, human need, “asphalt complex”
120. In this passage, the word ‘immanent’ is closest in meaning to :
- (a) Inevitable
 - (b) Intentional
 - (c) Serendipitous
 - (d) Inherent
